Swedish Higher Vocational Education

Swedish Higher Vocational Education

Learning through actual experience

At post-secondary level, Swedish Higher Vocational Education (HVE) combines theory and practice and is delivered in close cooperation with industry sectors. HVE programmes are designed to meet labour market demands and allow the students to put learning into practice through work placement.

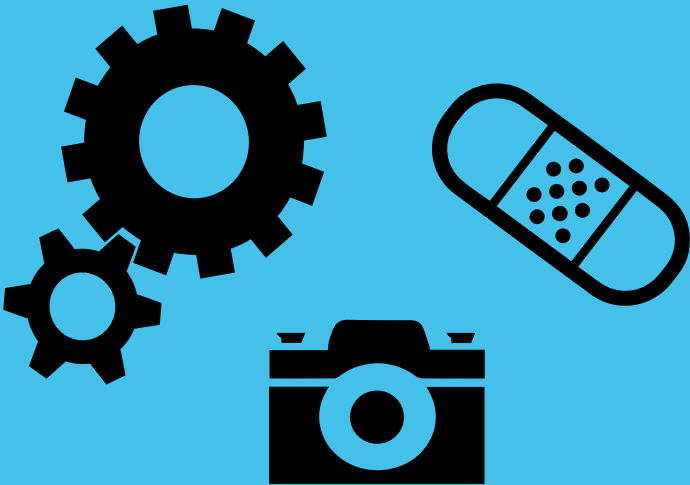

The majority of programmes vary in duration from 1 to 3 years.

LIA

Programme content for those comprising 400 HVE credits includes at least 25% work placement. The placements are referred to as LIA (learning in a work environment).

HVE graduates are sought after and are regularly recruited by companies straight after or even before completing their studies.

There are 16 fields of study with different specialisations to choose between. Everything from Hotel Manager to Robot Operator.

Interested? You'll find a complete list of offered programmes at yrkeshogskolan.se. For further information about a specific programme, please contact the school offering the programme directly.

**Graduation on
Friday, going to
work on Monday.**

HVE graduates often find employment straight after completing their studies. About 89 percent of the 2014 graduates were either employed or self-employed by autumn 2015.

The programmes offered are regularly reviewed in order to meet the changing demands of the labour market.

HVE tutors and lecturers are experienced professionals.

In 2015, there were 46 400 enrolled HVE students in 237 different specialisation fields over 1 845 cohorts.

Higher Vocational Education programmes are offered throughout Sweden.

The Swedish National Agency for Higher Vocational Education is the regulatory authority responsible for the supervision and inspection of the programmes.
